

ROHAN SHAMANTHULA
Java Full Stack Developer

Mountainview, CA | +1 (316)-928-9781 | shamanthularohan@gmail.com |

SUMMARY

Java Full Stack Developer with 3+ years of experience designing, developing, and deploying scalable web applications using Java/J2EE technologies and cloud-based solutions. Adept at creating efficient microservices, enhancing application performance, and implementing CI/CD pipelines for optimized deployment. Proven ability to collaborate with cross-functional teams and mentor junior developers to deliver high-quality solutions. Expertise in leveraging cutting-edge technologies to streamline processes, reduce costs, and improve application reliability.

TECHNICAL SKILLS:

- **Languages:** Java (8, 11, 17), JavaScript, Python, SQL
- **Front-End:** React.js, Angular 14, HTML5, CSS3, Bootstrap
- **Back-End:** Spring Boot, Hibernate, JPA, REST APIs, Spring Security
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins
- **Databases:** MySQL, PostgreSQL, MongoDB, Cassandra
- **Testing Tools:** JUnit, Mockito, Selenium
- **Others:** Apache Kafka, RabbitMQ, Git, Splunk

PROFESSIONAL EXPERIENCE

INTUIT, Mountainview, CA

Java Full Stack Developer

June 2024 – Present

- Architect **microservices** using Spring Boot, reducing deployment time by **40%**.
- Design and implement **RESTful APIs**, improving integration between systems.
- Build responsive user interfaces with React.js and Angular 14, decreasing load times by **30%**.
- Integrate secure authentication protocols with Spring Security and OAuth 2.0, mitigating vulnerabilities.
- Deploy scalable applications on AWS (EC2, S3, Lambda), cutting infrastructure costs by **25%**.
- Achieve zero-downtime deployments via Docker and Kubernetes, ensuring **high availability**.
- Automate CI/CD workflows using Jenkins, reducing deployment cycles by **50%**.
- Optimize database queries with Hibernate and PostgreSQL, improving execution times by **20%**.
- Enable real-time messaging with Apache Kafka for distributed systems.
- Improve code coverage to **95%** through rigorous testing with JUnit and Mockito.

Environment: Java 21, Spring Boot, Hibernate, React.js, Angular 14, PostgreSQL, MongoDB, AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins, Splunk, Linux, Windows.

Cognizant Technology Solutions (CTS), India

Java Developer

June 2022 – Oct 2022

- Migrated monolithic applications to a **microservices architecture**, reducing downtime by 15%.
- Developed **REST APIs** to streamline system integrations, enhancing data processing speeds.
- Improved the user experience with **Angular 14** and optimized UI responsiveness by 25%.
- Configured **Spring Batch** for efficient handling of data-intensive workflows.

- Deployed containerized applications using **Docker** and **Kubernetes**, achieving 99.9% uptime.
- Implemented **Apache Kafka** for reliable asynchronous messaging across services.
- Automated workflows with **Maven** and **Jenkins**, accelerating deployment cycles.

Environment: Java 11, Spring Boot, Angular 14, MongoDB, Oracle, AWS EC2, Docker, Kubernetes, JIRA, Jenkins, Splunk.

HDFC Bank, India

Jr Java Developer

May 2021 – June 2022

- Developed **RESTful APIs** using Spring Boot, ensuring seamless front-end and back-end communication.
- Migrated legacy relational databases to **Cassandra**, increasing scalability and reducing latency.
- Enhanced system reliability by implementing **Apache Kafka** for distributed messaging.
- Conducted unit and integration testing with **JUnit**, improving code coverage by 30%.
- Monitored production environments using **Splunk**, reducing resolution time for critical issues by 20%.

Environment: Java 8, Spring Boot, React.js, Cassandra, MySQL, Kafka, JUnit, Splunk.

CERTIFICATIONS

- **AWS Certified Solutions Architect - Associate.**
- **Microsoft Certified: Azure Developer Associate.**

KEY ACHIEVEMENTS:

- Optimized API response times by 30% by refactoring microservices architecture.
- Designed and implemented a **student administration system** using Django, achieving streamlined operations for 500+ users.
- Spearheaded **real-time data processing** using Apache Kafka, enabling a 20% reduction in latency for distributed systems.
- Automated deployment pipelines using Jenkins, reducing manual intervention by 50%.

EDUCATION:

- **Master of Science in Computer Science**
Wichita State University, Wichita, Kansas, USA
- **Bachelor of Technology in Electronics and Communication Engineering**
Gokaraju Rangaraju Institute of Engineering and Technology, India
